

My experience

«Studying EIPB has given me a wide range of career opportunities, and provided knowledge on a broad spectrum of topics. I was able to work and study at the same time, focusing on those subjects I was more interested in, and those concepts I needed for a rapid application at the bank.»

My University

- An International environment: 1st University in France with the highest number of foreign students. More than 5,000 foreign students from 164 countries
- Equal opportunities: since 1965, the only State University on the French Riviera (District of Alpes-Maritimes) with a multidisciplinary offer
- History and modernity: from its historic roots back in 1639 to high technology with its campus located in the Sophia Antipolis Science and Technology Park.
- More than 25,000 students and 1,200 teachers-researchers.

My School

- Since 1966, The academic reference in chartered accounting, finance, management, and business administration.
- A strategic geographic location with the 2nd international airport in France, the Sophia Antipolis Science and Technology Park, the nearby Principality of Monaco, and the proximity of Italy.
- 1,200 students including 470 of foreign nationality, and an international teaching staff.
- Highly career-oriented degrees: more than 100 professional contributors and mandatory internships in all curricula.

Master European and International Private Banking

International Private Banking

Be a global expert in
the banking sector

Program Overview

You have achieved a solid experience in business, completed business graduate studies and you wish to specialise in private banking, or move into higher management positions in finance: this is the degree you need.

The EIPB Ms degree is designed to train banking experts proficient in detecting and analysing problems and providing solutions in a complex global financial environment.

This program will provide you with a good theoretical foundation of finance, quantitative and financial market tools.

These skills will enable you to provide reliable strategic analysis of risk in private banking worldwide:

- Manage portfolio and assets
- Evaluate risks and investments in order to elaborate strategic orientations, sales and purchases in banking
- Master financial aspects in international business transactions (solvency, payment delays, treasury, change rates...)

With many international students, faculty and business practitioners this course will provide you with effective and highly interactive lectures, where scholars from different horizons, backgrounds, ages and countries meet and share their knowledge and experience with you.

Our alumni have joined worldwide renowned banking groups as corporate banking managers, managers of International banking, sales managers, portfolio managers, private banking managers, etc.

Classes are composed of a maximum of 30 students.

Your courses are scheduled three days a week (Thu-Fri-Sat), over twenty-five weeks from September to March, in order to allow you to study and also work part time at the same time if you so choose.

If you are an executive or an employee, you may be able to complete your Masters without leaving your actual job. The total coursework is composed of 48 week-days and 24 weekend-days. Using your 25 bank holidays (in France), only a reduction of your workload to 80% during 6 months is to be negotiated with your employer.

In order to complete this comprehensive framework, you will take part in a business simulation game role-play, a mandatory internship of at least 4 months abroad, and the defence of a dissertation.

The proximity to Monaco's international financial hub may help you to more easily find your internship in this field.
